PROFESSIONAL SUMMARY

Passionate about automation and data analytics, seeking a DevOps Engineer role to apply my knowledge of cloud computing, CI/CD pipelines, containerization, and automation tools to drive efficient software delivery and continuous improvement.

TECHNICAL SKILLS

Languages: Python, C, HTML, CSS,
JavaScript/TypeScript

Frameworks: React, Next.js, Node.js

DevOps & Cloud: Docker, Kubernetes, Jenkins,
AWS

Tools: Git, GitHub, VS Code,
Power BI

PROJECTS

CI/CD Pipeline for Full-Stack App

Docker, Jenkins, K8s

Implemented a complete DevOps pipeline for a full-stack web application, automating the process from code integration to deployment and monitoring. Ensured faster, more reliable, and scalable software delivery with real-time system visibility and alerts.

Drug Detection Using ML

Python, ML

Developed a model to classify and detect drug types based on chemical properties using supervised learning algorithms. Implemented data preprocessing and feature extraction, achieving improved detection accuracy through model tuning.

EDUCATION

Bachelor of Engineering (B.E.)

Expected 2027

Artificial Intelligence & Data Science

CGPA: 8.5

Shridevi Institute of Engineering and Technology, Tumkur

ADDITIONAL INFORMATION

- Languages:** English, Kannada, Hindi

- **Certifications:** Programming Fundamentals in Python (Infosys Springboard)
